Summary

Third-year Computer Science undergraduate building production-quality software across systems and applied AI. Focused on designing modular, scalable architectures, most recently a real-time computer vision platform for human movement analysis built around a reusable biomechanics engine. Strong foundation in data structures, algorithms, and object-oriented design, with hands-on experience in computer vision, feature extraction, and machine learning pipelines. Looking to bring the same architectural rigor to Software Engineering and AI internship roles.

Education

Vellore Institute of Technology
B.Tech in Computer Science
CGPA: 8.9/10

2024 – 2028

Technical Skills

Programming: Python, C++, Java, JavaScript

Libraries & Frameworks: OpenCV, MediaPipe, NumPy

Core CS: Data Structures, Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks, Compiler Design

Tools: Git, GitHub, VS Code

Projects

ExerciseIQ – Real-Time Human Movement Analysis Platform

Python, OpenCV, MediaPipe

- Architected a modular, exercise-independent biomechanics engine that separates pose estimation, feature extraction, and movement evaluation into independently testable layers
- Built a real-time pose estimation and joint-angle computation pipeline with OpenCV and MediaPipe to extract biomechanical features from live video
- Designed a rule-based movement intelligence layer for form analysis, rep counting, and real-time coaching feedback, structured for extension to new exercises
- Implemented a session analytics layer that aggregates movement data into performance visualizations and session reports

Fake News Detection using NLP

Python

- Developed an NLP pipeline to classify news articles as real or fake, covering text preprocessing, tokenization, and normalization
- Engineered text-based feature representations for classification using standard NLP feature-extraction techniques
- Trained and evaluated a classification model to detect misinformation patterns across a labeled news dataset

Login Interface

HTML, CSS, JavaScript

- Built a responsive login interface with client-side validation
 - Implemented user input handling and form validation using JavaScript
-

Coding Profiles

LeetCode: leetcode.com/u/1Jb6u0iq5c

GeeksforGeeks: geeksforgeeks.org/profile/gurpreetsil17k

Additional Skills

Public Speaking, Technical Writing, Research, Video Editing & Content Creation
